## Armistice or Remembrance Day

'In Flanders' fields the poppies blow  
between the crosses, row on row  
that mark our place; and in the sky  
the larks, still bravely singing, fly  
scarce heard amid the guns below.

We are the dead. Short days ago  
we lived, felt dawn,  
Saw sunset glow,  
loved and were loved,  
And now we lie in Flanders' fields.

Take up our quarrel with the foe;  
to you from failing hands we throw  
the torch; be yours to hold it high,  
if ye break faith with us who die,  
we shall not sleep, though poppies grow  
in Flanders' fields.

At approximately 05:00 on Monday, 11<sup>th</sup> November 1918, 98 years ago today, the Armistice was signed in a railway carriage of Marshall Foch's special train located in the forest at Rethondes in France on the western front.

(Continued from page 1)

At 11:00 on this Monday the 11<sup>th</sup> November 1918, the roar of guns ceased and peace and silence finally descended on the western front, ending the First World War. It is estimated that close to 9,5 million soldiers, sailors and airmen of all sides died in the Great War.

## IOTA News

Record-holders, who have made IOTA contacts in an IOTA contest after 2003, can claim credit for them without submitting QSLs, if the contact details match, either by manually entering the QSO information on the input form or by uploading a Cabrillo format log.

The 2016 IOTA Contest data has now been uploaded to the IOTA database and is available for QSO matching. "Some users have experienced issues with their contest QSOs being rejected," PA3EXX reported on 2 November. "This has been fixed now and users are invited to upload their logs one more time."

Please note "logs of 12 operations out of 718 which participated have been excluded from being uploaded as the IOTA Validation Team (VT) is awaiting documentation", G3KMA said on 30 October. "It should be noted that if an operation is asked by VT (not the same as the RSGB Contest Committee) for validation and this is not sent in good time, QSO matching will not be allowed and a warning that the operation will not be accepted for IOTA will be posted on the database for applicants to note. In certain circumstances this could affect contest results."

## Club Log's Most Wanted List

The latest Most Wanted List, generated on 31 October, is available at <https://secure.clublog.org/mostwanted.php>. The information is derived from QSOs uploaded to Club Log (currently 386 million log entries available for analysis) and to improve quality, only QSOs that have QSLs confirmed are considered to be worked.

## False radio calls on the aircraft band

An item I heard on commercial radio news this week made my ears prick up - as no doubt have many a pilot's ears!

### False radio calls on the aircraft band in the Melbourne Flight area.

I asked WIA's Jim Linton for more and he has told us that no less than 15 hoax radio calls on AM aeronautical channels have been made in the past weeks at Tullamarine Airport Melbourne, and the Avalon Airport near Geelong.

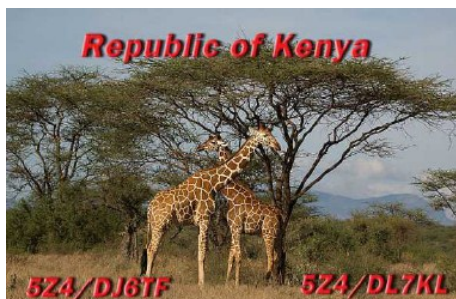

Here is what happened:

A man pretends to be in a control tower and orders three jets to abort their landing.

Impersonation of a light aircraft with engine trouble putting out a may-day call.

The story has attracted wide media attention across newspapers, television and internet news sites. Melbourne's Age and Sydney Morning Herald newspapers ran a story headed "lone-wolf hoaxer", and unfortunately included a comment that "... rudimentary amateur VHF radio equipment could be used in such a hoax."

The media coverage continued

## WRTC 2018

The official competition rules for the 2018 World Radiosport Team Championship that will be held in Germany have been released and are now available at <http://wrtc2018.de/index.php/en/competition>. "We have discussed the rules with potential competitors by e-mail as well as with the WRTC Sanctioning Committee," Uwe Koenneker, DL8OBF, Director of the WRTC 2018 Rules Committee said. "Publishing the rules about 20 months before the event gives potential competitors the chance to practice according to these rules." Any questions concerning the rules should be addressed to [competition@wrtc2018.de](mailto:competition@wrtc2018.de) or to the WRTC 2018 Mailing List.

that a number of federal government agencies were investigating, but did say there were fears that copycat amateur radio operators might try the same thing.

Members of various Amateur Radio Facebook sites picked up on the newspaper reports, expressing alarm and concern that Amateur Radio could be implicated in such a negative way.

Some radio amateurs e-mailed the Wireless Institute of Australia (WIA) with their concerns.

The Institute understands that amateurs would be justifiably upset about any connection with such dangerous and illegal rogue transmissions. Some have expressed the view that individual radio amateurs should write-in to set the record straight and that the WIA should make a strong statement to the offending publications.

However, the WIA strongly advises caution about individuals making complaints.

In situations like this, misunderstanding is easily compounded and may make matters worse by re-invigorating the original story from another angle. It is common for the media to focus on the "issue of the moment" in a way that sensationalises matters, which could easily be to our detriment.

Fortunately, the lone-wolf air-traffic radio hoaxer story had a very limited run.

The WIA is prepared for the story to arise again, and is developing a considered response to the media to counteract any negative references to Amateur Radio.
